Description

The Advanced HMI cMT3072X2 from Weintek with its quad-core 64-bit RISC 1.5 GHz processor enables very high performance in the visualization of data. The cMT3072X2 not only works like an ordinary HMI, but is also a cMT (HMI) server, which provides up to 9 additional operating instances. This makes it possible to monitor and control the visualization of the cMT3072X2 via the cMT Viewer APP on a panel PC (PPC002/005), mobile devices, in addition.

The IIoT standard protocols OPC UA and MQTT enable you to communicate between your machines/systems and the higher-level control/management systems. This ensures simultaneous monitoring and control of your transmission data, whether locally or on a cloud platform such as AWS, Azure or GoogleIoT. The optional license for the EasyAccess2.0 remote access service allows you to visualize the HMI on end devices such as PCs, smartphones and tablets from an external location. With EasyAccess2.0, you can access devices in the network via the cMT3072X2 using the "Path Through" method.
