

Ewon Flexy expansion card Mobile radio 4G LTE

- Expansion card for Ewon Flexy base modules
- Mobile radio card for GSM, 2G/GPRS, 3G/UMTS/HSUPA, 4G/LTE

<https://www.wachendorff-prozesstechnik.de/en/FLB3204>

Description

This expansion card for the Ewon Flexy base modules provides a mobile radio interface for the Ewon Flexy's Internet access. The router uses this interface to establish the connection to the Internet. The best available network (4G/LTE, 3G/HSUPA/UMTS, 2G/GPRS) is used. The VPN tunnel is then established or e-mails are sent via this route, for example. Sending and receiving SMS is also supported.

Please select the appropriate card for the respective region and compare with frequency bands of specific countries and mobile phone providers:

FLB3204 Europe (band 1, 3, 7, 8, 20, 28)

Product details

Interfaces:	1x SMA socket
Speed:	Max. 150 Mbit/s download Max. 50 Mbit/s upload
Supported frequency bands:	<u>FLB3204 Europe</u> UMTS/HSUPA: 1800 MHz (B3), 900 MHz (B8) LTE: 2100 MHz (B1), 1800 MHz (B3), 2600 MHz (B7), 900 MHz (B8), 800 MHz (B20)
Power supply:	About the basic module
Weight:	< 300 g
Operating temperature:	-25 °C to +60 °C
Relative humidity:	10 % to 95 %, non-condensing
Manufacturer:	HMS Industrial Networks AB
