### Description

This WebPanel series is based on a powerful RK3288 quad-core Cortex-A17 processor.

The WebPanels are available in display sizes from 7" to 23.8" with either projected capacitive or no touch. The projected capacitive touch enables multi-touch operation.

The housings are IP65 rated on the front and have a very compact and robust design thanks to the aluminum housing. The WebPanel can be used almost anywhere thanks to its low installation depth.

The WebPanel is based on the Android 10.0 operating system and is therefore ideal for installing your own web applications. The integrated WiFi and Bluetooth interfaces enable a wide range of applications.
