Description

The ViTAM-9 series is based on an Intel 4th Gen. Core i3-4010U processor.

The industrial panel PCs in this series are available in display sizes from 15" to 24", with either projected capacitive or resistive touch. The projected capacitive touch enables multi-touch operation with a corresponding operating system. If pressure-sensitive operation is required (e.g. with gloves), the resistive touch is the right choice. The front panels are absolutely flush with the stainless steel housing (type 304). The housing is designed in IP69K (incl. IP66) with M12 connection options. An on/off button is also integrated on the side of the Panel PC. The unique fanless thermal design of the robust stainless steel housing enables effective temperature control. The ViTAM IPC can be optionally equipped with a high-brightness LCD and/or optical bonding for an outstanding display, even under the most difficult conditions. In addition, expansion cards for further interfaces or RFID can be integrated.
