Description

The PPCCOA series is a powerful series of robust industrial Panel-PCs designed for demanding environments. The Panel-PCs in this series have a capacitive touchscreen and a fanless, all-round IP65-protected housing that offers a high level of protection against dust and water jets. The devices are optionally available with Intel® Celeron, or Core™ processors and offer different display sizes to meet different requirements.

The front panel is individually configurable and can contain integrated operating buttons such as emergency stop, selection and push buttons so that the devices are ready for immediate use for industrial control tasks. For maximum flexibility, the Panel-PCs support swivel arm mounting and offer a variety of interfaces for seamless integration into existing systems.
