Description

Netbiter Argos is a cloud-based remote maintenance portal on which the operating data of your systems is stored. You can access the data via the Internet and, depending on the Netbiter service package, use various functions to display the log data. In addition to data management, Netbiter Argos also manages the connection to the systems and devices in the field.

Product details

Hardware requirements:	Remote maintenance gateway of the Netbiter EasyConnect series
Software requirements:	Standard web browser software (Internet Explorer, Firefox or Google Chrome)
Manufacturer:	HMS Industrial Networks AB

Products Order no.

NB4000	Manage & analyze functions for one device, for 12 months
