Regulation (EC) No. 1907/2006 (REACH)

Duty to communicate information in accordance with Article 33, SVHC substances

Dear Ladies and Gentlemen,

As a manufacturer/distributor of "articles", our company is a so-called "downstream user" under the REACH Regulation within the meaning of Article 3 cipher 13 of the REACH Regulation and is not responsible as such for the (pre-) registration of substances or substances and preparations.

According to REACH Regulation, the supplier of a product must inform the downstream customers of Substances of very high concern (SVHC) that are contained in a concentration of more than 0.1 % by weight in preparations and products, or if products can release chemicals.

In close cooperation with our suppliers we couldn't find evidence for any SVHC whatsoever in products distributed by our company, according to the above mentioned criteria, that we have delivered to your company.

We are fulfilling our information obligations according to REACH Article 33, if new findings are available or further ingredients of our products (containing more than 0.1 % by weight) are classified by the European Chemicals Agency as particularly alarming.

We ensure this by our actively organized and regular exchange of information with our suppliers.

For products of the company HMS Industrial Networks please see the REACH letter link:
[REACH/HMS](#)

At this time, there is no need for us to report articles in the SCIP database. We check this at regular intervals

Yours faithfully

Armin Hardt
Programm and Key Account Manager
